No. 652.

Yesterday arrived 2 Mails from Flanders, *and* 2 *from* France.

ACCORDING to Letters from Moscow, the deplorable State of that City since the late Fire there, is not to be expressed, by reason of the many Thousand People reduc'd to the utmost Misery. The Czarina, therefore, has ordered those who are burnt out of their Houses, to be lodged in the neighbouring Villages and Hamlets, and to be furnished with Bread and other Necessaries for their Subsistance. For this Purpose, all the Officers are charged to send them forthwith, all the Bread, Flower, &c. that they can spare. Mean while, the principal Inhabitants have set Hands to Work Night and Day in removing the Rubbish, and the last Quantity of Timber is sent thither for rebuilding the City; where all the Streets, which were before extremely irregular, are for the future to be uniform. 'Tis observed, that the like Misfortune has not happened in that City for these hundred Years past, except it was in the Time of the Impostor Demetrius; and the Damage is computed at above 10,000,000 of Rubles.

The Letters from Florence of the 2d Inst. O. S. which mention the Death of the Great Duke of Tuscany on the 28th of June, say, that when his Body was opened, they found 7 Stones in the Bladder, 2 Polypus's in his Heart, the Ventricle almost consum'd, and all the Intestines in general relaxed: And that after the Corpse was embalmed, it was dressed in the Habit of the Grand Master of the Order of St. Stephen, and expos'd in the Anti-Chamber, from whence it was removed to the Great Hall of Bona, where it lies in State: And on the 1st Instant in the Morning, the Senate and the Magistrates assembled at the Sound of the Bell in the Old Palace Royal, in the Hall of the said Palace, which was hung with Mourning, and took the Oath of Allegiance and Obedience to the Duke of Lorrain, in the Person of the Prince de Craon, his Plenipotentiary.

Those from Paris, dated on Saturday last, bring the Account of the Death of the Cardinal Henry Prince de Thiard de Bissy, on the 15th, in the 81st Year of his Age. He was the oldest Bishop in the Kingdom, having been consecrated for the Diocese of Toul in 1692, and translated in 1704 to that of Meaux. Pope Clement XI. created him a Cardinal the 29th of May 1715, and Lewis XV. appointed him Prelate of the Order of the Holy Ghost in 1724. He was also a Doctor of the Sorbonne, and Abbat in Commendam of St. Germain de Prez, and de Trois Fontaines. By his Death there's a 6th Hat vacant in the Sacred College. He has made his Nephew, the Marquis de Bissy, his sole Heir. His Corpse was carry'd on the 19th to his Bishoprick of Meaux, there to be interred. The same Day M. Mongeron, a Counsellor of Parliament, was taken up, and committed to the Bastille.

Letters of the 7th from Vienna say, the Emperor has appointed the Chevalier de Sinzendorf his Ambassador for the Court of Turin; for which Court he is speedily to set out, as is the Count de Kinsky, on his Embassy for London.

From St. Christopher's they write, that the Ship Prince William, Capt. This Ship had been so long sailed, that the Merchants concerned in her here, having had no Advice of her, apprehended she was lost at Sea.

A successful Specifick, in the Cure of Convulsive Diseases,

By a CLERGYMAN.

THE Extraordinary Effects of this Medicine, more especially in the Case of Children's Fits, will be attested (if required) by many Persons of Rank and Quality, whose Children have been instantly recovered by it, under the most deplorable Circumstances, and when given over by some of the most eminent Physicians and Apothecaries, in City and Country, and from their repeated Importunities it is that this Medicine is, once more, advertised for publick Good: Its Operation is wonderful, safe, and sure; a small Quantity of it being presently, and with some little Continuance apply'd, according to the printed Directions, surprizingly stops, and cures the most stubborn and dangerous Fits in all Children; the Preservation of some of whose Lives by this Medicine, hath been known to be of very valuable Consequence to those Families to which they belong: Its Success is likewise remarkably certain upon Grown Persons, even in the most Inveterate Epilipsies, if taken with those previous Evacuations, as directed in the Method of Cure.

To be had only at Vizer's Coffee-house, in Earl's Court, in Bow-street, Covent Garden; at Half a Guinea the Bottle, with printed Directions.

WHereas many Inconveniencies have attended the former manner of supplying the Kingdoms of England and Ireland with Pyrmont Water; particularly, the Water frequently lay long in the Merchants Hands at Bremen before transported to England, and afterwards yet longer in the Possession of the Sellers in London before sold: so that oftentimes, before it came to the Drinkers Hands, it would be a Year old, or upwards. Moreover I have detected Persons filling Bottles (marked with a Star, like those in which I used to fill the Pyrmont Waters) at a common Spring, in order to transport and impose them upon the Publick, for the true Waters of Pyrmont. And further, to my certain Knowledge, great Quantities of false Waters were purposely filled in this Country, and imposed last Year on the Publick designedly, by some Traders in England, in order to prejudice this Fountain, and to the Detriment and Disappointment of the Drinkers. And on the other hand, being well assured of the Integrity of Mr. EYRE, sworn Purveyor of all Mineral Waters to their Britannick Majesties, and being an Eye-Witness of the Improvements he has made in filling these Waters, whereby they are now transported in greater Perfection: Therefore I do appoint him, jointly with my Brother JOHN-HENRY REISENER, to transport into England and Ireland the said Waters, which shall be sent them from time to time, and be sold by *them only*, or by such as *they shall appoint*, by which Method the Dominions of his Britannick Majesty will be constantly supplied with FRESH PYRMONT WATER, and the foregoing Inconveniencies be in some measure prevented: And for a further Caution, all the Bottles filled with the said Water will have the Arms of his Highness the Prince of Waldeck impressed on the Side, agreeable to a Patent granted them by his Highness for that Purpose; and all such as are not thus marked, agreeable to the above Impression, are not to be depended on to be the true Waters of Pyrmont.

Pyrmont, Mar. 30. 1737. CHRISTIAN-ULRICH REISENER, *Master of the Pyrmont Wells.*

THESE are to certify, That Messr. JOHN-HENRY REISENER and HENRY EYRE have caused to be filled, in their Presence, 34,113 Bottles of Pyrmont Water, which Water was filled in a good Season, and when it was in its utmost Perfection, and was corked, wired down, and secured by an excellent Composition, after an improved Method.

Pyrmont, May 26. 1737, N. S. D. JOHN PHILIP SEIP, *Counsellor and Physician to his Highness the Prince of Waldeck at Pyrmont.*

These WATERS are sold at Mr. EYRE's Mineral Water-Warehouse, near *Temple Bar.*

Where also are constantly sold the following Mineral Waters, *viz.*

SPA, SELTERS,	BORNE, HOLT,	BATH, BRISTOL,	SCARBORO'

N. B. Mr. EYRE Imploys his whole Time in attending and filling the several Waters, particularly those of *Pyrmont* and *Spaw*
